Reception Hours: Monday-Friday 10.00 – 12.00-Tuesday and Thursday afternoons: 14.30 – 16.30

Presentation of the MASTER and employment opportunities

## Text in English:

*Advanced oral surgery is continuously improving with innovative techniques and minimally invasive technologies. The dentist who performs surgery and implantology can not ignore the modern techniques: the clinician is therefore strongly motivated to perfect his advanced oral surgery skills in order to better prepare the intraoral conditions compatible with an implantation rehabilitation, even complex, in the most predictable and compliant as possible. On the other hand, the approach to a complex surgical phase requires specialized high quality training for the professional who wants to have managerial skills both of the patient in good health and of the patient with pathologies that put him at risk of complications intra- and postoperative. The Master will increase the level of skills of the oral surgeon and will allow to perform complex interventions with great safety and expertise.*

*The teaching organization provides an intensive formula in frontal teaching modules of two days a week (generally Friday and Saturday) for eighteen months. All lessons will be video recorded and translated into multilanguage or Italian / English / Spanish / French / Greek / Romanian / Arabic (however, at least in Italian / English translation will be guaranteed through national and international experts and courses and the use of multimedia equipment for FAD e-learning distance learning using the ADA UNIBA platform and FAD E-learning platform of the City Unity College of Greece and Cyprus, as per the collaboration signed with Uniba (Attachment No. 1).*

*The duration of the Master is two Academic Years and will most likely end in December 2019.*

*In respect of the articulation of the educational didactic path, both with reference to the frontal and online FAD E-learning activities, and with reference to the didactic and assisted activities (laboratory, but also to the possible integrative activity on a voluntary basis and of personal interest of the Participant in the*

international Master's program, the percentage limits established by the University general regulations for University Masters must be assessed for the purpose of validating the compulsory attendance to the Master.

Particular situations, considering the international value of the Master, will be evaluated in advance by the CTS Council for a better definition of the training path of the single participant, in the best interest of the studies and the acquisition of an excellent educational background provided by this University to the single participants.

The lessons will be on ADA UNIBA platform and City Unity College (they will be at least bilingual Italian / English but will try to complete all the translations in the above languages) and all students through a personal password will have access to all the lessons in the language more compliant to them and they will have to follow the lessons via FAD e-learning and answer the 15 quizzes foreseen by the Master for each single lesson.

It is noted that for the second level International Master (always similar to implant surgery) 70 lessons were inserted on the FAD ADA UNIBA platform.

## Course Organization

It is specified that the Master international and is 120 CFU and will last 24 months for which there will be members from all over the world.

For this reason, the University of Bari has stipulated many agreements to encourage research, teaching and post-training activities, Erasmus also mundus.

For this reason, over 150 lesson (in multilingual) that will be included in the ADA UNIBA platform for FAD e-learning, student can practice both in the dental clinic (the writer has returned to the assistance with Policlinico) and will also be able to do further activities patient practice at one of the conventional facilities with Uniba. These hours of practice on patients at the affiliated facilities are apart from the 3000hours of frontal and home teaching that every student will have to perform

Attendance at educational and training activities is mandatory, with a tolerance of 20%.

Places available Minimum Number 10

Maximum number 150

Auditors 10
