Graduates are able to ensure the safety, quality, and wholesomeness of food and non-food products and foodstuffs.

The Plant Production and Crop Protection (PVPC) curriculum focuses on in-depth study of plant production techniques and processes, with particular attention to agronomic, phytosanitary, and sustainability aspects of cropping systems.

The Rural Systems Management (GSR) curriculum provides an integrated and systemic view of the activities and issues related to agricultural business management, with a focus on economic, organizational, and environmental aspects.
