Principali informazioni sull'insegnamento		
Denominazione dell'insegnamento	**Restoration and conservation of archaeological sites**	
Corso di studio	LM-2 Archeology	
Anno accademico	2022-2023	
Crediti formativi universitari (CFU) / European Credit Transfer and Accumulation System (ECTS):		: 6
SSD	ICAR/19	
Lingua di erogazione	Italian	
Periodo di erogazione	Secondo semestre (27.02.2023 – 19.05.2023)	
Obbligo di frequenza	The frequency is governed by the didactic regulation of the course which can be consulted at the following link https://www.uniba.it/corsi/archeology/presentazione delcorso/copy_Of_RolamentaDidaDIUDIOTICATAOLOGHIOCHA.PDF	

Docente	
Nome e cognome	ANGELA DICEGLIE
Indirizzo mail	Angela.diceglie@uniba.it
Telefono	0805714089
Sede	Palazzo Ateneo Piazza Umberto 1 Bari Piano primo stanza n. 8
Sede virtuale	
Ricevimento (giorni, orari e modalità)	To be agreed by e-mail

Syllabus	
Obiettivi formativi	
Prerequisiti	• *Basic knowledge of the history of restoration* • *Ability to work in a team*

Contenuti di insegnamento (Programma)	The global knowledge of the artefact enjoys an enlarged observation point and therefore can be proposed for the development of new activities related to the restoration / maintenance and recovery of the cultural heritage. The course aims to provide skills and knowledge in the field of conservation, maintenance and restoration of the archaeological heritage through interventions, also at an operational level. The training course is aimed at illustrating operational methods aimed at reconstructing the sedimentation process of the territorial context and the construction phases of the building in order to define maintenance and restoration intervention strategies. Course contents: history of architectural restoration; analysis of the artefacts aimed at recognizing the construction phases; analysis of the deterioration and instability of the artifacts; stratigraphic analysis of the facades; historical-documentary analysis.
	 Articulation of the course
	   - The course includes four stages of development:
	   - Theoretical lessons on the fundamentals of the discipline
	   - Exercises on the topics covered in class

	- Exercises on specific topics such as site inspections, documentary analysis, degradation analysis, stratigraphic survey - Application of the methods learned in class

Risultati di apprendimento previsti	
Conoscenza e capacità di comprensione	• Applied knowledge and understanding: students will acquire application skills through the help of field work and exercises.
Conoscenza e capacità di comprensione applicate	• Ability to learn: the course will allow you to acquire and develop learning skills, through the method of "knowing" and "knowing how to do".
Competenze trasversali	• Autonomy of judgment: autonomy of judgment will be stimulated through the use of the skills acquired in the analysis of concrete cases. • Communication skills: the student will have to acquire communication and exposure skills through design reviews where he will be required to communicate the results of his individual work to the class • Ability to learn autonomously: Knowledge and understanding: the course aims to provide the tools to know and understand the methodologies of the restoration of archaeological sites in an autonomous way

Valutazione	
Modalità di verifica dell'apprendimento	Oral discussion and verification of the exercises developed during the course
Criteri di valutazione	• Knowledge and understanding: the assessment will take into consideration the student's autonomous understanding • Applied understanding and understanding: The assessment will take into account the applied understanding

	• Autonomy of judgment: The evaluation will take into consideration the student's autonomy of judgment
	• Communication skills: The assessment will take into consideration the student's communication skills
	• Ability to learn: the assessment will consider the student's learning ability
Criteri di misurazione dell'apprendimento e di attribuzione del voto finale	Students must demonstrate that they have at least sufficiently acquired the methods and contents of the discipline and the ability to interpret, autonomous re-elaboration and presentation through an advanced degree of mastery of technical language
