Learning Objectives	The basic objective is to give broad and previously not acquired
	knowledge related to the Italic cultural environment.
	In addition, the knowledge of the archaeology of the Italic world
	becomes a link between Greek, Magna Graecia and Roman
	archaeology, weaving in the skills of each a homogeneous and
	composite picture of the history and archaeology of ancient Italy.
Course prerequisites	Topics, chronological and geographic scope of the course are
	different from those in the first cycle of study. Prerequisites are the
	skills learned before about the classical and pre-classical archeology.

Teaching strategie	Lessons will be face-to-face. Teaching is organized with the constant
	active participation of the students. During all lessons, images will be
	projected for each subject and detail discussed.
Expected learning outcomes	

in terms of	
Knowledge and	o The students will learn specialist skills through the topics
understanding on:	discussed.
	o They will learn a method of investigation: the reasoned
	reading of equal situations that can found within the ancient
	Italy.
Applying knowledge and	o Teaching aims to give broad and new knowledge about the
understanding on:	Italian cultural field; the student will be able to inscribe these
	on knowledge about other of cultural, chronological and geographical field.
Soft skills	Making informed judgments and choices
Soft Skills	o The learned knowledge of the most important cultural
	expressions of Italic populations becomes the basis to
	understand the archaeological items that student will find
	in future studies or work experience.
	Communicating knowledge and understanding
	o The subjects learned during the course will allow the
	student to use a specific language in the future.
	o Students will be able to read an image and communicate
	through the images (for formative, scientific,
	dissemination needs).
	• Capacities to continue learning o The student can use and apply the research method and
	o The student can use and apply the research method and the contents learned during the course for other
	geographical and chronological context or to more
	specific case studies.

Assessment methods Assessment criteria	Oral examination, with support of the images. • Knowledge and understanding • Give proof of knowledge of the topics discussed and ability to speak clearly and well organized, with appropriate links between the different cultures studied. • Applying knowledge and understanding
Assessment criteria	 Give proof of knowledge of the topics discussed and ability to speak clearly and well organized, with appropriate links between the different cultures studied. Applying knowledge and understanding
•	 Knowledge about pre-Roman Italy that are a link and expand the knowledge of Greek, Roman and Magna Graecia acquired in the first cycle. Autonomy of judgment Ability to apply autonomously the critical approach and reading of other contexts and case studies. Communicating knowledge and understanding Communication skills Knowledge of a specific language and ability-based reading of an archaeological image. Capacities to continue learning Acquiring a replicable and adaptable method.
criteria e e F w g g	The final grade will be the result of the average evaluation of all the evaluation criteria. For a high grade we will evaluate the ability of a fluent exposition with critical observations and links between the topics and the geographical areas covered. Insufficient assessment 18-21: sufficient assessment 22-24: discrete 25-27: good
