**Auxiliary teaching:****Assessment methods: WRITTEN TEST****Assessment criteria:**

- a. Ability to solve problems: that is to apply what they have learned in a real situation, identifying the areas of knowledge that best allow them to face it: Students will apply to current economic reality what they have learned during the course in terms of understanding of processes and critical evaluation of economic policies
- b. Analyzing and synthesizing information: that is, acquiring, organizing and reformulating data and knowledge from different sources: Students will be encouraged to provide synthetic reports of the economic phenomena analyzed.
- c. Making judgments independently: that is, interpreting information with a critical sense and making consequent decisions: Students will be daily invited to express their judgments on current economic problems and economic policies at national and international level.
- d. Communicate effectively: i.e. transmit information and ideas in both oral and written form in a clear and formally correct way, expressing them in appropriate terms with respect to the specialist or non-specialist interlocutors in the sector: Students will be invited to prepare oral and written reports on economic topics from current reality.
- e. Continuous learning: that is, knowing how to recognize one's gaps and identify effective strategies aimed at acquiring new knowledge and skills: Students will be asked to intervene and correct their mistakes during the exercise activities.
