Syllabus	
Prerequisites/requirements	The course requires basic knowledge of business administration and economics of financial intermediaries. Prerequisites: Business administration and general accounting (as prescribed by the didactic rule book). It is also advisable to have taken the "Economics of financial intermediaries" exam.
Expected learning outcomes	<p><i>Knowledge and understanding on:</i></p> <p>The course aims to provide basic knowledge of financial markets and financial portfolio management. The aim of the course is to provide an organic and punctual representation of the functioning of financial markets, in their structural and organizational aspects, as well as by framing the different types of financial instruments and intermediaries, so as to fully understand their functions and the opportunities offers to operators of the economic system. Particular attention is paid to financial advising and portfolio management.</p> <p>At the end of the course, the student must have acquired: a) adequate economic and financial language; b) understanding and ability to illustrate the financial markets; c) capacity of analysis of the process of financial portfolio management. Through this knowledge, the student will be able to understand all the dynamics taking place in financial markets.</p> <p><i>Applying knowledge and understanding on:</i></p>

	<p>The Financial Portfolio Management course aims to provide all the analytical and conceptual tools for understanding the functioning of financial markets and intermediaries. The student must be able to apply the basics to real contexts and specific cases, to support personal arguments, to identify the most appropriate solutions, and to develop adequate theoretical abstraction skills.</p> <p><i>Making informed judgements and choices</i> The course of Financial Portfolio Management aims to encourage the reflection on economic and financial phenomena which influence the portfolio management also through the analysis of case studies. The aim is to provide the tools that allow a critical view of the main economic-financial phenomena and an adequate critical and interpretative capacity.</p> <p><i>Communicating knowledge and understanding</i> The course is designed for those who approach for the first time the study of the financial system and financial markets and aims to provide the student with a terminology of current use in the financial markets. At the end of the course, the student will have to demonstrate the ability to apply the terminology appropriately.</p> <p><i>Capacities to continue learning</i> At the end of the course, the student must have the learning skills necessary to obtain an employment on economic, financial and banking sector, or to undertake further studies, in these sectors, with a high degree of autonomy.</p>
