Syllabus	
Learning Objectives	<i>The course aims to develop, from an economic-business point of view, the theoretical and methodological knowledge concerning the preparation, the analysis and the interpretation of the financial statements and consolidated financial statements of companies. Therefore, the student is provided with the tools useful for learning the principles and techniques of drawing up the financial statements (seen as a summary of the financial statements) in order to stimulate the critical reading skills useful to appreciate the economic conditions of the company. At the end of the course the student will be able to understand the main problems related to corporate management and the preparation of the financial statements and consolidated financial statements.</i>
Course prerequisites	
Contents	<i>Financial statement theory. The civil statutory financial statement: aims, postulates, principles. The balance sheet. The income statement. The supplementary note. The management report. The financial statement in abbreviated form. Intangible, tangible assets (amortization, impairment tests, maintenance, capital gains, leasing) and financial assets. Inventories, contract work in progress, loans and cash. Accruals and deferrals. Shareholders' equity (increases and decreases in capital, profits and losses, financial statements). The provisions for risks and charges. Foreign currency transactions. Taxes (current, deferred and prepaid). The model of the IAS / IFRS balance sheet. International accounting standards. The models of the consolidated financial statements. The false accounting. Cases and budget exercises. Reading of real budgets</i>
