Program	
Bibliography	<i>Corso di Scienza delle finanze</i> . Custom publishing. Prof.ssa Annalisa Vinella, Università degli Studi di Bari "Aldo Moro", Dipartimento di Economia e finanza, CREATE McGraw Hill
Notes	None
Teaching methods	The course includes traditional lectures by the instructor and tutorials devoted to problem solving. The instructor makes a massive use of the blackboard, especially when dealing with analytical topics. Both traditional lectures and tutorials are meant to enable students to acquire analytical and methodological skills.
Assessment methods	Written examination (including exercises and true-false questions) in the three first exam sessions following the end of the classes. Oral examination in the exam sessions to be held thereafter.
Evaluation criteria	<p>Students will be evaluated according to:</p> <ol style="list-style-type: none"> 1. their knowledge of the fundamental notions and concepts of public economics and taxation theory, that are essential for a correct understanding of the basic issues in the subjects; 2. their ability to use the basic analytical tools to address the issues aforementioned. <p>Students' (in)ability to use a proper economic language will be taken into account as well.</p>
Further information	<p>The knowledge of the fundamentals of microeconomic theory is an essential prerequisite. Erasmus students who consider attending classes and sitting in the exam are strongly advised to verify if they do match the requirement and are thus prepared for a fruitful engagement in the course.</p> <p>The organization of the exam sessions, as previously described, is intended for a situation in which the sanitary conditions associated with the SARS-COV 2 epidemic are such that it is possible to make regular use of university buildings. Variations might be possible, should the evolution of the epidemic not allow for that, in which activities would take place online.</p>
