

General Information	
Academic subject	Economics
Degree course	Law
Curriculum	
ECTS credits	9
Compulsory attendance	No
Language	Italian

Subject teacher	Name Surname	Mail address	SSD
	Claudia Capozza	claudia.capozza@uniba.it	SECS-P/01

ECTS credits details	Area	SSD	CFU/ETCS
Basic teaching activities	13	SECS-P/01	9

Class schedule	
Period	Second term
Year	Second year
Type of class	Lectures

Time management	
Hours	225
In-class study hours	72
Out-of-class study hours	135

Academic calendar	
Class begins	February 24, 2022
Class ends	May 27, 2022

Syllabus	
Prerequisites/requirements	None
Expected learning outcomes	<p><i>Knowledge and understanding on:</i></p> <ul style="list-style-type: none"> ○ The Economics course aims to provide students with the analytical knowledge and tools needed for micro and macroeconomic analysis of economic agents (consumers, firms and institutions) in a market economy. <p><i>Applying knowledge and understanding on:</i></p> <ul style="list-style-type: none"> ○ The student will be able to apply the theoretical knowledge acquired during the course to correctly interpret the main topics and problems of economic systems. <p><i>Making informed judgments and choices:</i></p> <ul style="list-style-type: none"> ○ The student will be able to independently and critically evaluate the economic behavior of individuals, business strategies and economic policy choices and to provide possible solutions to real economic problems. <p><i>Communicating knowledge and understanding</i></p> <ul style="list-style-type: none"> ○ At the end of the course, the student is expected to master the technical language and to adequately argue and discuss on hypothetical and real economic problems. <p><i>Capacities to continue learning</i></p> <ul style="list-style-type: none"> ○ At the end of the course, the student will be able to illustrate and discuss, at the microeconomic level, on consumption and production choices, on market equilibrium, and on the main market forms and market failures; at the macroeconomic level, on production and economic growth, on problems relating to unemployment, inflation, savings and investments.

<p>Contents</p>	<p>The course aims to illustrate the fundamental concepts of microeconomic analysis regarding the behavior of individuals and firms in a market economy. Furthermore, the course deals with issues that characterize the functioning of the economic system as a whole, by examining, from a short and long-term perspective, the main macroeconomic variables, such as employment, national income, consumption, inflation.</p> <p><i>Introductory concepts.</i> Ten principles of economics. Thinking like an economist. The graphs and tools of an economist.</p> <p><i>Microeconomics.</i> Market forces: supply and demand. Elasticity of supply and demand. The Theory of Consumer Choice: budget constraint, preferences and optimal choice. Consumers, producers and market efficiency. Demand, supply and economic policies. Production decisions of firms. Firms in a competitive market. Market structures: monopoly, monopolistic competition and oligopoly. Inefficient market allocations: public goods, common resources and meritorious goods; externalities and market failure. Economics of Labor Markets. Income inequality and poverty.</p> <p><i>Macroeconomics.</i> Measuring a Nation's Income. Measuring the cost of living. Long-term economy: production and growth; unemployment. Savings, investment and financial system. Monetary system. Money growth and inflation. Short-term economic fluctuations: economic cycles, IS-LM model. Aggregate demand, aggregate supply and effects of monetary and fiscal policy. Short-term trade-off between inflation and unemployment.</p>
