

**COURSE OF STUDY** *Physics (LM-17)*
**ACADEMIC YEAR** 2023-2024

**ACADEMIC SUBJECT** *Electronic bio-sensors*

General information	
Year of the course	2nd
Academic calendar (starting and ending date)	1st semester: September - December 2023
Credits (CFU/ECTS):	3
SSD	CHIM/01
Language	English
Mode of attendance	Compulsory

Professor/ Lecturer	
Name and Surname	Luisa Torsi
E-mail	Luisa.torsi@uniba.it
Telephone	+39 080 544 2092
Department and address	Department of Chemistry, Floor 0, Office n. 7
Virtual room	-----
Office Hours (and modalities: e.g., by appointment, on line, etc.)	Office hours upon appointment

Work schedule			
Hours			
Total	Lectures	Hands-on (laboratory, workshops, working groups, seminars, field trips)	Out-of-class study hours/ Self-study hours
75	16	15	44
CFU/ECTS			
3	2	1	

<b>Learning Objectives</b>	<i>Electronic bio-sensors is a lecture course designed to provide MSc Students with an advanced knowledge on the development of novel biosensing platforms. Particularly, the course will focus on: (1) Physics of organic thin-film transistors, (2) Physical and chemical properties of electrolyte-gated devices, (3) Electrochemical biosensors (potentiometric and amperometric), (4) Enzyme-based Boolean Logic Gates and Mathematical Modelling of Enzyme-based Amperometric Biosensors (5) Machine learning based data analysis.</i>
<b>Course prerequisites</b>	<i>Solid State Physics, Semiconductor Structures, Laboratory of Digital Device, computational Physics</i>

<b>Teaching strategy</b>	<i>Lectures with projected slides, lab activity followed by data analysis. It is extremely important to use the material projected during the lectures. The course will be held in class.</i>
<b>Expected learning outcomes in terms of</b>	The course <i>Electronic bio-sensors</i> will supply the student with knowledge about electronic bio-sensors accounting for theoretical and practical skills.
<b>Knowledge and understanding on:</b>	<ul style="list-style-type: none"> <li>o The course <i>Electronic bio-sensors</i> will supply the student with knowledge about electronic bio-sensors accounting for theoretical and practical skills.</li> </ul>

<b>Applying knowledge and understanding on:</b>	<ul style="list-style-type: none"> <li>o Ability to discuss on the development of novel electronic bio-sensors, data analysis and modelling.</li> </ul>
<b>Soft skills</b>	<ul style="list-style-type: none"> <li>● <i>Making informed judgments and choices</i> Ability to develop an electronic bio-sensor.</li> <li>● <i>Communicating knowledge and understanding</i> Ability to write lab reports; Ability to discuss the knowledge acquired about the different topics both during the oral exam. Use the appropriate terminology.</li> <li>● <i>Capacities to continue learning</i> <ul style="list-style-type: none"> <li>o Compare data obtained by using different sensors.</li> </ul> </li> </ul>
<b>Syllabus</b>	
<b>Content knowledge</b>	<p><b>Biosensors: Theory and Applications (1 CFU, 8 hours):</b> <i>Physics of organic thin-film transistors. Physical and chemical properties of electrolyte-gated devices. Electrochemical biosensors (potentiometric and amperometric). Single molecule biosensors working at the physical limit. Analytical figures of merit of biosensors.</i></p> <p><b>Modelling of Enzymes-based Amperometric Biosensors (1 CFU, 8 hours):</b> <i>Enzyme-based Boolean Logic Gates and Mathematical Modelling of Enzyme-based Amperometric Biosensors.</i></p> <p><b>Data analysis (1 CFU, 15 hours):</b> <i>Machine learning based data analysis. Lab activity.</i></p>
<b>Texts and readings</b>	<p><i>Some course materials will be provided as electronic (pdf) files. Particularly the following electronic books (RECOMMENDED, not REQUIRED) will be available for the students:</i></p> <ol style="list-style-type: none"> <li>1. <i>E. Katz. Enzyme-Based Computing Systems. Wiley-VCH Verlag GmbH &amp; Co. KGaA. ISBN: 9783527345700.</i></li> <li>2. <i>Fondamenta per la Chimica Analitica (pubblicato, con il patrocinio di SISNIR, con ISBN: 9788890406461</i></li> </ol>
<b>Notes, additional materials</b>	<i>All slides and additional material will be supplied as complementary study material.</i>
<b>Repository</b>	<i>OneDrive, GoogleDrive</i>

<b>Assessment</b>	
<b>Assessment methods</b>	<i>Oral Exam</i>
<b>Assessment criteria</b>	<ul style="list-style-type: none"> <li>● <i>Knowledge and understanding</i> Evaluation at the oral exam with questions about the different topics encountered during the course. Correct terminology. Knowledge of equations.</li> <li>● <i>Applying knowledge and understanding</i> Evaluation of lab activity. Knowledge of equations and their application to practical cases.</li> <li>● <i>Autonomy of judgment</i> Auto-evaluation through the interactive questions at the end of each lecture. Additional explanations and clarifications will be given during office hours.</li> <li>● <i>Communicating knowledge and understanding</i> Ability to discuss about a specific topic with the correct terminology, with a critic evaluation of the analytical methods discussed during the class.</li> <li>● <i>Capacities to continue learning</i> Ability to compare results obtained with complex analytical approaches.</li> </ul>
<b>Final exam and grading criteria</b>	Evaluation of the answers on the different topics encountered during the course. Correct terminology. Knowledge of equations.
<b>Further information</b>
