Learning Objectives	The course aims to provide students with the fundamental notions of law, in particular of its fundamental branches: public, private and international law. Students will thus be familiar with the structure of the State and will be able to recognize its essential organs; they will acquire the necessary skills in the field of relations between individuals by distinguishing the essential institutes of private law. They will also include the functioning of supranational relations, the nature of international organisations - including the European Union - as well as the global organisation of sport and sports federations.
Course prerequisites	No

Teaching strategie	Conventional teaching methodology: lectures, case studies and case-law analysis, possible seminars. Use of multimedia tools.
Expected learning outcomes in terms of	
Knowledge and understanding on:	The student will have acquired knowledge of the main institutes of private law, in particular contracts and mandatory relationships, as well as the main profiles of public law and international law.
Applying knowledge and understanding on:	The student will be aware of the role of law in the community as well as in the various recreational and/or competitive sports.
Soft skills	<p>Students must have the ability to collect and interpret data (normally in their field of study) that they consider useful to determine autonomous judgments, including reflection on social, scientific or ethical issues related to them.</p> <p>students must be able to communicate information, ideas, problems and solutions to specialist and non-specialist interlocutors</p> <p>At the end of the course the student must be able to adequately describe the legal argument</p> <p>Students must have developed those learning skills that are necessary for them to undertake subsequent studies with a high degree of autonomy.</p> <p>At the end of the course students must be able to understand private, public and international law independently</p>
