Expected learning outcomes	- Knowledge and understanding among contemporary languages and praxis of the old and the new audiovisual texts Applying knowledge and understanding the lexicon of semiotic concepts in cinema and other audiovisual texts Making informed judgements and choices concerning primary and secondary literature, along as multimedia materials such as movie, videoclip, tv serial, advertising Communicating knowledge and understanding due to facultative short oral expositions and/or posters to the class, along with participative frontal lectures Capacities to continue learning in a realm of individual study through crossing medial languages and praxis.
Contents	Starting from Walter Benjamin's seminal reflection of 1936 on the technical reproducibility of images through photography and cinema, we will analyze the advent of visual culture (Pinotti, Somaini 2016) according to a mediological perspective, which sees in the visual work of Charlie Brooker its apogee (Black Mirror seasons in the program constitute the imaginary of postmodern era). In this sense, from the broadcast worldwide of the moon landing (1969) and the contemporary release of Space Oddity by David Bowie, to the exit of the rock opera The Wall (1979) by Pink Floyd, we reach the interactive film Bandersnatch (2018) to understand and analyze the different levels of reality mediated by technology.
