## **COURSE OF STUDY Sciences and Management of maritime activities L-28**

## **ACADEMIC YEAR** 2023/2024

## **ACADEMIC SUBJECT Maritime English**

Learning objectives		Object Ivial		8		
Academic Calendar  II term from March to June 2024 Credits (CFU/ETCS):  8  SSD  L-LIV/12 Language  80% English 20% Italian Mode of attendance Highly recommended  Lecturer/Professor Name and Surname e-mail address Ganiela.andriulo@gmail.com Department and Address Taranto Largo, Bezzi c/o Scuola Sottufficiali MM Virtual room Office hourse (by appointment, online, etc)  Work schedule Total amount In-class hours Practice By appointment and/or online before or after each lecture Online, etc)  Work schedule Total amount In-class hours The course aims at providing the Students with the necessary knowledge tackle the requirements of the maritime activities in the light of communicative purposes in the English language. The students will be elicited in order to approach English as a "global a international language" evaluating its morphological, syntactical, lexical a grammatical aspects. Different varieties will be taken into account to becommore independed user of English and interpret the different contexts of usage.  Prerequisites  No preliminary knowledge is required. However, it is recommended that the basic skills ( receptive and productive) reach A2/B1 of the CEFR levels. Syntax and grammar should be consolidated prior to the course to mismother in terms of learning and acquisition.  Teaching strategies  Lectures, projects, discussions and case studies. English is seen as a language evolution and so emergent data will be taken into account. The course enhanced by the use of coherent and relevant matials, even digitally.  Expected learning outcomes in terms of language and communicative functions			T

tackle the requirements of the maritime activities in the light of communicative purposes in the English language.  The students will be elicited in order to approach English as a "global a international language" evaluating its morphological, syntactical, lexical a grammatical aspects. Different varieties will be taken into account to becommore independet user of English and interpret the different contexts of usage.  Prerequisites  No preliminary knowledge is required. However, it is recommended that the basic skills (receptive and productive) reach A2/B1 of the CEFR levels.  Syntax and grammar should be consolidated prior to the course to make smoother in terms of learning and acquisition.  Teaching strategies  Lectures, projects, discussions and case studies. English is seen as a language evolution and so emergent data will be taken into account. The course enhanced by the use of coherent and relevant matials, even digitally.  Expected learning outcomes in terms of:  • grammar structures in English  • development of language and communicative functions	8					
Expected learning outcomes in terms of:  - Knowledge and understanding on:  - Knowledge and understanding on:  - grammar structures in English - development of language and communicative functions	Prerequisites		The students will be elicited in order to approach English as a "global and international language" evaluating its morphological, syntactical, lexical and grammatical aspects. Different varieties will be taken into account to become a more independet user of English and interpret the different contexts of usage.  No preliminary knowledge is required. However, it is recommended that the 4 basic skills (receptive and productive) reach A2/B1 of the CEFR levels.  Syntax and grammar should be consolidated prior to the course to make smoother in terms of learning and acquisition.			
Applying knowledge and understanding on:			- Knowl	edge and understanding on: grammar structures in English development of language and communicative func translation competences in maritime fields		

	<ul> <li>by the end of the course the Students will have understood the features of the maritime activities internationally speaking</li> <li>ability to use resources and tools ( databases, dictionaries, etc)</li> </ul>		
	Soft skills Making informed judgments and choices		
	. students will be able to comment autonomously on the authentic material proposed as well as reflect on the relevant aspects to the maritime fields		
	Communicative knowledge and understanding		
	<ul> <li>students are expected to express themselves coherently</li> <li>report and comment on facts and events</li> <li>interact showing and proving Q&amp;A abilities in work/life-situations</li> </ul>		
	Capacities to continue learning		
	<ul> <li>using the resources and the tools proposed to deepen autonomously the aspects which are more attractive to the students so that they can advance in the field of maritime studies</li> </ul>		
Syllabus	<ul> <li>- introduction to the English language system (morphology, syntax, lexis)</li> <li>- contrastive analysis and ESP language</li> <li>- exercises to develop receptive skills fiurst and subsequently to work more on productive ones</li> <li>- translation and reformulation sub-skills</li> </ul>		
	- international fields of work, pronunciation features, accent and monoreferentiality of the ESP language connected with the need of a plain		
Texts and readings	language "TN Blakey, English for maritime studies", 2nd Edition Prentice Hall International,		
	1987 "L. Avola, Master's English, Terminology, rules and procedures for use in the merchant Navy in the Blue economy + Workbook, Erga Edizioni, 2020 Capitoli selezionati		
	Teacher-generated matierial provided in the light of a more inclusive approach		
Notes	Integrative web pages  • imo.org  • marlin test  • https://link.springer.com/journal/40152  • https://www.jmr.unican.es/index.php/jmr https://www.wmu.se/research/priority-areas		
Repository	Files section to Ms Teams room		
Assessment			
Assessment methods	In itinere tests to adjust the contents of the course while proceeding.  The oral test aims to assess the language competences achieved taking B1 level as a reference.  Specifically the test will assess: knowledge of lexis and grammar; fuency and interactivity at a semantic level.		
	<ul> <li>minimus timing required 7 minutes</li> <li>glossaries or dictionaries made available if needed</li> </ul>		

Assessment criteria	<ul> <li>Knowledge and understanding</li> <li>using grammar structures easily and fluently to prove vocabulary right and presentation of clear and proper knowledge/concepts</li> </ul>
	Applying knowledge and understanding
	students prove their acquired knowledge by organising their discourse and answers effectively without any help or stimuli by the professor
	Autonomy of judgment
	students show their abilities to make informed judgement and comments analysing the questions and proposing their points of view backed up by the concepts of the course
	Communicating knowledge and understanding
	students implement ESP language wisely and effectively and there is no need for the professor to elicit answers
	Capacities to continue learmning
	<ul> <li>students are more inclined and have improved their abilities to do research by self-organising the materials</li> </ul>
Final exam and grading criteria	Final grade is expressed as "approved or not approved".  Students shall demonstrate to master the language as much fluent as they can to convey the meanings without much effort and in a straightforward way. Also, the technical and ESp language should be used effectively and without much hesitation.
