150 hours	48		102
CFU/ETCS			
ECTS credits 6			

Learning Objectives	The course aims to provide the fundamental knowledge of the natural resources present in North African countries and the tools to reflect on strategies to be adopted for their better management. This will also foster a culture of new development opportunities for the countries examined and cooperation between Italy and the Mediterranean basin.
Course prerequisites	There are no specific prerequisites

Teaching strategie	The course will be conducted through lectures, with the use of multimedia tools (power point, etc.); slides and useful materials will be uploaded onto the e-learning platform to support the
---------------------------	---

	<p>lectures and guide individual study, group work and seminar activities.</p> <p>The frontal teaching activity may be supplemented by thematic in-depth studies in seminar form such as individual lectures, study days with qualified speakers.</p>
Expected learning outcomes in terms of	
Knowledge and understanding on:	<p>At the end of the course, students will have to demonstrate adequate knowledge of the following topics: general overview of the economic situation in North African countries, understanding of the phenomenon of migratory flows, the natural resources of the countries under consideration with particular regard to production, oil and natural gas reserves and energy production and consumption. Actions for the development of the economic autonomy of North African countries.</p>
Applying knowledge and understanding on:	<p>The student will have to use the acquired knowledge to apply it to future strategies of sustainable management of natural resources and actions for the development of economic autonomy of North African countries and cooperation in the Mediterranean.</p>
Soft skills	<p style="text-align: center;">Informed judgements and choices</p> <p>The student will integrate the knowledge acquired during the course with his or her own basic knowledge in order to demonstrate the ability to interpret the complexity of the economic processes covered, contextualising the issues to current events and independently organising the elements acquired.</p> <ul style="list-style-type: none"> • Communication skills The student is expected to communicate the acquired knowledge clearly and correctly in technical language, expounding the notions with argumentative coherence both in thematic seminars and in the final evaluative interview. • Ability to learn autonomously • The student will have to demonstrate that he/she can concretely apply the knowledge acquired during the course and that he/she is able to analyse the various problems with an interdisciplinary perspective, also with a view to further in-depth studies and/or further study.
Syllabus	

<p>Content knowledge</p>	<p>1.The countries of Mediterranean Africa: Algeria, Libya, Morocco, Tunisia, Egypt. The socio-economic and environmental context. The problems: major instabilities, social, political and religious.</p> <p>2.Analysis of migratory flows from North African countries The general characteristics of migratory phenomena in the Mediterranean. The main routes of migrants from North African countries: countries of departure and destination. Opening of economies and integration processes. The main critical issues.</p> <p>3.Analysis of the natural resources of North African countries Differences between sub-regions and North Africa Concept of natural resources: distinctions. a) Natural resources in Tunisia, Algeria, Libya, Egypt and Morocco The economic context and macroeconomic data. Analysis of oil and natural gas production and reserves. The strategic importance of phosphate minerals and the chemical industry. Analysis of other country-specific resources. The analysis of the composition of energy production in terms of type of source (fossil, renewable) and energy consumption by sector of use. The trend of trade between Italy and the various countries mentioned above. The main market operators, Italian presence in the above-mentioned countries.</p> <p>4. Actions for the development of the economic autonomy of North African countries. Combining the objectives of economic development, social equity and the principle of environmental sustainability for the implementation of Agenda 2030. Future strategies for better management of natural resources and new business opportunities: a. stimulating investments in the different economic sectors in order to decrease migration flows b. use of innovative technologies in order to transform their current problems into a potential workforce that promotes their sustainable growth c. stimulation of decarbonisation policies aimed at curbing the contribution of fossil sources to energy production.</p> <p>5. The development of international cooperation and integration policy within an integrated vision of transformation. Implementing an alliance for sustainable investment and employment within the partnership between the European Union and the African Union. The renewed strategic vision of Italian Cooperation in North Africa.</p>
