		<b>Office:</b> Department of Political Science Room    Floor	
<b>Office days and hours:</b>			
<b>Prerequisites:</b> knowledges of the basic topics			
<b>Educational objectives:</b>			
<b>Expected learning outcomes (according to Dublin Descriptors)</b>		<p><b>Knowledge and understanding:</b> acquiring, organizing and reworking data and knowledges from different sources</p> <p><b>Applying knowledge and understanding:</b> apply what has been learned in a real situation, identifying the knowledge areas which deal better with</p> <p><b>Making judgements:</b> critical information understanding and make consequent decisions</p> <p><b>Communication:</b> transmit information and ideas in both oral and written form in a clear and formally correct way, expressing then in appropriate terms with respect to specialist interlocutors in the sector;</p> <p><b>Lifelong learning skills:</b> that is, knowing how to recognize one's gaps and identify effective strategies aimed at acquiring new knowledge and skills.</p>	
<b>Course program</b>			
The theoretical-practical course will deal with:			
<ul style="list-style-type: none"> <li>- The social- economic cohesion policy of the European Union, its influence on Italian administrations and social - economic impact; tools and principles of the Cohesion Policy. The Community Budget and the Multi- Year Financial Plan. Genesis of Structural Funds and vertical and horizontal programming. Direct and Indirect Funds. Community programs. Horizon 2020 program and Horizon Europe;</li> <li>- From the idea to project. The Project Cycle (PCM), the Logical Framework Approach (LFA) and intervention logic in the analysis and design phases. Study and method of drafting a "call for proposal"; methods and techniques for carrying out the activities necessary for the drafting and presentation of European projects in the response to a specific call published by the European Commission</li> <li>- Cognitive path and use of European, National and Regional portals</li> </ul>			

**Teaching methods:** Frontal lesson – work for groups

**Auxiliary teaching:**

oral examination

**Assessment methods:**

- Knowledge and understanding: learning of the technical language necessary for understanding community, national and regional programs;
- Applied knowledge and understanding: ability to autonomously establish logical links between related concepts, even if not sequentially articulated, concerning above all the content of historical part (especially referring to the past) with the theoretical part (referring to the current European perspective) - interpreting needs and turn them into goals;
- Autonomy of judgment: Ability to take a position on the conceptual contents of the program and development of an autonomous critical sense, especially in relation to the process of European unification and its prospects - knowing how to transfer what has been learned into a project proposal;
- Communication skills: ability to correctly communicate one's thoughts to the target group, partner, stakeholder, correctness in the articulation of language and possession of the scientific basic;
- Ability to learn: ability to learn the topics of the subject and to restructure the information according to the problems that arise, interpret the main sources, keep up to date and follow the info days of the programs proposed by the responsible body or funder.
