Syllabus	
Prerequisite requirements	
Expected learning outcomes (according to Dublin Descriptors)	<p><i>Knowledge and understanding</i></p> <p><i>Applying knowledge and understanding</i></p> <p><i>Making informed judgements and choices</i></p> <p><i>Communicating knowledge and understanding</i></p> <p><i>Capacities to continue learning</i></p>
Contents	<p>During the course it will focus attention on the learning process, framed through different approaches: from behavioral theories, cognitivist to the more modern approaches of constructivism and cultural psychology. Particular attention will be placed on the role played by the environment in the learning process, with reference to the key concepts of the socio-cultural perspective. Will explain the various methods of organization and management of some of the main lessons / learning techniques such as the lesson and the collaborative learning models. In particular, the educational psychology will be discussed as an inter-subjective process based on the speech and action. In addition it reviews the various models of community both in</p>

	<p>face to face environments in virtual environments. Compared to the latter will be explored the possibilities of designing learning paths with the support offered by the technology.</p>
Course program	
Bibliography	<p>Ligorio, Cacciamani (2013). Psicologia dell'Educazione. Roma: Carocci</p>
Notes	
Teaching methods	<p>The course will take place through lectures. There will be 1 or 2 seminars with guest speakers.</p>
Assessment methods	<p>The exams will be held in the form of oral interview. A test will be exempted from the interview. The test will be built collaboratively with students during classes and administered only at the first examination date.</p>
