Syllabus	
Learning Objectives	<ul style="list-style-type: none">- Assimilation of general concepts, ability to rework them and apply them to other micro-areas of the discipline- Ability to apply the assumed knowledge to some specific cases in the area- Ability to judge the veracity of concepts, using the appropriate bibliography- Ability to use technical language specific to the discipline- Ability to memorize and assimilate basic concepts and detailed notions related to the discipline
Course prerequisites	Knowledge of issues related to the transformation of artistic phenomena in the centuries of the Middle Ages.
Contents	The course intends to give space to a crucial area of medieval art, that of sculpture of the Angevin age, which has always played a marginal role in the historiographical debate relative to the Apulian territory, where the Romanesque phenomenon and the age of Frederick II have always been able to boast a sort of monopoly. After tracing the main stages of the artistic becoming of the Middle Ages, especially in the moment known as the Late Middle Ages, some of the most important Apulian sculptural evidence will be analyzed in relation to painting and the suntuary arts. Specifically, the relations between the capital of the Angevin Kingdom, Naples, and Apulia will be investigated, to ascertain its role as intermediary and sieve in relation to the French court in Paris. In addition, the monographic focus on the Marian theme in Apulia will allow contextualizing the presence and irradiation of social and artistic phenomena with an international imprint in

	<i>territories that, undeservedly, are still considered 'peripheral' and instead show a good level of creative autonomy. In addition, some specific and little-known figures of sculptors will be explored in order to reconstruct their formative profile and production over the decades.</i>
