JOURNAL ARTICLES

- E. Loffredo, C. Carnimeo, V. D'Orazio, N. Colatorti. Sorption and release of the pesticides oxyfluorfen and boscalid in digestate from olive pomace and in digestate-amended soil. *Journal of soils and sediments* (2024). <https://doi.org/10.1007/s11368-024-03748-3>
- E. Loffredo, C. Carnimeo, N. De Chirico, A. Traversa, C. Coccozza. The liquid by-product of biogas production: characterisation and impact on soil fungi. *Environmental Technology* (2023). <https://doi.org/10.1080/09593330.2023.2220888>
- C. Carnimeo, N. Colatorti, V. D'Orazio, P. Trotti, E. Loffredo. Potential of biochar from wood gasification to retain endocrine disrupting chemicals. *Materials* 16, 569 (2023). <https://doi.org/10.3390/ma16020569>
- C. Carnimeo, A. Gelsomino, G. Cirrottola, M. R. Panuccio, E. Loffredo. Compost and vermicompost in cucumber rhizosphere promote plant growth and prevent the entry of anthropogenic organic pollutants. *Scientia Horticulturae* 303, 111250 (2022). <https://doi.org/10.1016/j.scienta.2022.111250>
- E. Loffredo. Recent advances on innovative materials from biowaste recycling for the removal of environmental estrogens from water and soil. *Materials* 15, 1894 (2022). DOI: 10.3390/ma15051894
- E. Loffredo, C. Carnimeo, R. Silletti, C. Summo. Use of the solid by-product of anaerobic digestion of biomass to remove anthropogenic organic pollutants with endocrine disruptive activity. *Processes* 9, 2018 (2021). DOI: 10.3390/pr9112018
- M. Parlavecchia, R. Gattullo, G. Perri, E. Loffredo. Modulatory effects of biochar, hydrochar and vermicompost on the growth of horticultural plants and phytopathogenic fungi. *Acta Horticulturae* 1311, 541-548 (2021). DOI: 10.17660/ActaHortic.2021.1311.69
- E. Loffredo, M. Parlavecchia. Use of plant-based sorbents and mycodegradation for the elimination of endocrine disrupting chemicals from soil: a novel facile and low-cost method. *Environmental Technology & Innovation* 21, 101358 (2021). DOI: 10.1016/j.eti.2021.101358
- E. Loffredo, G. Picca, M. Parlavecchia. Single and combined use of *Cannabis sativa* L. and carbon-rich materials for the removal of pesticides and endocrine disrupting chemicals from water and soil. *Environmental Science and Pollution Research* 28, 3601-3616 (2021). DOI: 10.1007/s11356-020-10690-7
- V. D'Orazio, D. Stallone, S. Sermani, E. Loffredo, M. Cirulli, G.L. Bruno. Phytotoxic metabolites produced by *Verticillium dahliae* Kleb. in olive wilting: a chemical and spectroscopic approach for their molecular characterisation. *Natural Product Research* 35, 1991-2001 (2021) DOI: 10.1080/14786419.2019.1652284.
- M. Parlavecchia, C. Carnimeo, E. Loffredo. Soil amendment with biochar, hydrochar and compost mitigates the accumulation of emerging pollutants in rocket salad plants. *Water, air, and soil pollution* 231, 554 (2020). <https://doi.org/10.1007/s11270-020-04915-1>.
- E. Loffredo, Y. Scarcia, M. Parlavecchia. Removal of ochratoxin A from liquid media using novel low-cost biosorbents. *Environmental Science and Pollution Research* 27, 34484-34494 (2020). DOI: 10.1007/s11356-020-09544-z.
- M. Parlavecchia, V. D'Orazio, E. Loffredo. Wood biochars and vermicomposts from digestate modulate the extent of adsorption-desorption of the fungicide metalaxyl-M in a silty soil.

Environmental Science and Pollution Research 26, 35924-35034 (2019). DOI: 10.1007/s11356-019-06729-z.

E. Taskin, G. Perri, E. Loffredo. Impact of type and dose of biochar and hydrochar on growth response of phytopathogenic and antagonistic soil-resident fungi. Fresenius Environmental Bulletin 28, 9070-9076 (2019).

E. Taskin, M. T. Branà, C. Altomare, E. Loffredo. Biochar and hydrochar from waste biomass promote the growth and enzyme activity of soil-resident ligninolytic fungi. Heliyon 5 (2019) e02051. DOI: 10.1016/j.heliyon.2019.e02051

E. Loffredo, M. Parlavecchia, G. Perri, R. Gattullo. Comparative assessment of metribuzin sorption efficiency of biochar, hydrochar and vermicompost. Journal of Environmental Science and Health, Part B - Part B Pesticides, Food Contaminants, and Agricultural Wastes 54, 728-735 (2019). <https://doi.org/10.1080/03601234.2019.1632643>.

E. Taskin C. de Castro Bueno, I. Allegretta, R. Terzano, A. H Rosa, E. Loffredo. Multianalytical characterization of biochar and hydrochar produced from waste biomasses for environmental and agricultural applications. Chemosphere 233, 422-430 (2019). <https://doi.org/10.1016/j.chemosphere.2019.05.204>.

E. Loffredo, E. Taskin. Response *in vitro* of lignin degrading fungi to single or combined applications of a biochar and a compost humic acid. Fresenius Environmental Bulletin, 27, 4084-4092 (2018). WOS:000437783100027

E. Loffredo, E. Taskin. Adsorptive removal of ascertained and suspected endocrine disruptors from aqueous solution using plant-derived materials. Environmental Science and Pollution research 24, 19159-19166 (2017). DOI: 10.1007/s11356-017-9595-z.

E. Loffredo, G. Castellana, E. Taskin. A two-step approach to eliminate pesticides and estrogens from a wastewater and reduce its phytotoxicity: adsorption onto plant-derived materials and fungal degradation. Water, air, and soil pollution 227, 188 (1-12) (2016). DOI: 10.1007/s11270-016-2883-2.

E. Loffredo, A. Traversa. Phytodecontamination of Water Systems from Phenolic Endocrine Disruptors and the Regulation Role of Natural Organic Matter. The Open Biotechnology Journal, 10, 173-183. (Suppl-1, M7) (2016). Publisher Id: TOBIOTJ-10-173 DOI: 10.2174/1874070701610010173 Bentham Open.

E. Loffredo, G. Castellana. Comparative evaluation of the efficiency of low-cost adsorbents and ligninolytic fungi to remove a combination of xenoestrogens and pesticides from a landfill leachate and abate its phytotoxicity. Journal of Environmental Science and Health, Part A 50, 958-970 (2015). DOI:10.1080/10934529.2015.1030294.

C. E. Gattullo, K. Kiersch, K.-U. Eckhardt, C. Baum, P. Leinweber, E. Loffredo. Decontamination activity of ryegrass exudates towards bisphenol A in the absence and presence of dissolved natural organic matter. International Journal of Phytoremediation 17, 1-8 (2015). DOI: 10.1080/15226514.2013.828011.

A. Traversa, E. Loffredo, A. J. Palazzo, T. L. Bashore, N. Senesi. Enhancement of switchgrass (*Panicum virgatum* L.) early growth as affected by composts. Journal of Soil Science and Plant Nutrition 14, 471-482. (2014).

E. Loffredo, A. Traversa. Soil and compost humic fractions regulate the response of *Sclerotinia sclerotiorum* to exogenously added allelochemical compounds. Biology and Fertility of Soils 50, 1281-1290. (2014). DOI: 10.1007/s00374-014-0944-5.

- G. Castellana and E. Loffredo. Simultaneous removal of endocrine disruptors from a wastewater using white rot fungi and various adsorbents. *Water, air, and soil pollution* 225, 1872 (2014). DOI: 10.1007/s11270-014-1872-6
- E. Loffredo, G. Castellana, N. Senesi. Decontamination of a municipal landfill leachate from endocrine disruptors using a combined sorption/bioremoval approach. *Environmental Science and Pollution research* 21, 2654-2662 (2014). DOI: 10.1007/s11356-013-2202-z.
- Traversa A., E. Loffredo, C. E. Gattullo, A. J. Palazzo, T. L. Bashore, N. Senesi. Comparative evaluation of compost humic acids and their effects on the germination of switchgrass (*Panicum virgatum* L.). *Journal of soils and sediments* 14, 432-440 (2014). DOI: 10.1007/s11368-013-0653-y.
- Gattullo C. E., B. Barboza Cunha, A. H. Rosa, E. Loffredo. Removal of a combination of endocrine disruptors from aqueous systems by seedlings of radish and ryegrass. *Environmental Technology* 34, 3129-3136 (2013). DOI: 10.1080/09593330.2013.807854.
- E. Loffredo, G. Castellana, A. Traversa, N. Senesi. Comparative assessment of three ligninolytic fungi for removal of phenolic endocrine disruptors from freshwaters and sediments. *Environmental Technology* 34, 1601-1608 (2013). DOI: 10.1080/09593330.2012.760654.
- Traversa A., E. Loffredo, A. J. Palazzo, T. L. Bashore, N. Senesi. Enhancement of germination and growth of slickspot peppergrass in a new medium with two compost organic fractions. DOI: 10.1080/00103624.2013.811523. *Communications in Soil Science and Plant Analysis* 44, 2636-2646 (2013).
- Gattullo C. E., A. Traversa, N. Senesi, E. Loffredo. Phytodecontamination of the endocrine disruptor 4-nonylphenol in water also in the presence of two natural organic fractions. *Water, air and soil pollution*, 223, 6035-6044 (2012). DOI: 10.1007/s11270-012-1337-8.
- Traversa A., S. Molinari, E. Loffredo. Quantitative aspects of the interaction between chemical activators of systemic acquired resistance in plants and humic acids. *Agrochimica*, vol. LVI (2), 112-119 (2012).

N. Senesi, E. Loffredo. Organic Matter-Interactions with Metals. In: Encyclopedia of Soils in the Environment. D. Hillel (ed.). Elsevier Ltd., Oxford, UK pg. 101-112 (2005). ISBN (Set): 0-12-348530-4

PROCEEDINGS OF NATIONAL AND INTERNATIONAL CONGRESSES

E. Loffredo, C. Carnimeo. Potential of carbon-rich byproducts of bioenergy production to remove endocrine disrupting chemicals from water and soil. Atti del XIV Convegno Nazionale dell'INBB "Ricerca e Innovazione per Ambiente, Salute ed Alimentazione". Roma, 17-18 novembre 2022. pp. 51-52 (2022). Editore VALMAR-Roma pp. 79-81 (2019) ISBN 978-88-97987-23-9

P. Devito, C. Carnimeo, E. Loffredo, D. Borello, V. Ancona, A. Pantaleo. Biochar from plant-assisted bioremediation: potential applications for sorptive removal of phenolic pollutants from water. Proceedings of the 16th Conference on Sustainable Development of Energy, Water and Environmental Systems (SDEWES). Dubrovnik (Croatia), October 10-15, 2021 (2021).

E. Loffredo. Impiego delle piante per la rimozione di pesticidi ed interferenti endocrini dal suolo. In: (a cura di Giovanni Antonini e Pietro Ragni) Atti del XIII Convegno Nazionale "Ricerca e Innovazione per Ambiente, Salute ed Alimentazione". Roma, 24-25 ottobre 2019. Editore VALMAR-Roma pp. 79-81 (2019) ISBN 978-88-97987-23-9

E. Loffredo, G. Castellana, E. Taskin. Uso di materiali vegetali a basso costo per la rimozione di contaminanti organici da un percolato di discarica e riduzione della sua fitotossicità. Atti del 40° Conv. Naz. Della Società Italiana di Scienza del Suolo, "Suoli di qualità per una vita di qualità". Roma, 1-3 dicembre 2015, 208-212 (2016). Ed. SISS, ISBN 978-88-940679-3-4 (2016).

E. Taskin, E. Loffredo. Effects of a biochar and its water extract on the in vitro growth of soil-resident ligninolytic fungi. Atti del 40° Conv. Naz. Della Società Italiana di Scienza del Suolo, "Suoli di qualità per una vita di qualità". Roma, 1-3 dicembre 2015, 132-135 (2016). Ed. SISS, ISBN 978-88-940679-3-4 (2016).

E. Loffredo, G. Castellana, E. Taskin. Removal of pesticides and estrogens from a wastewater and abatement of its *phytotoxicity* using plant-derived adsorbents and ligninolytic fungi. Atti Convegni ECOMONDO 2015, Maggioli Editore, Santarcangelo di Romagna (RN), pp. 174-179. Rimini, 3-6 novembre 2015. ISBN 978.88.916.1438.4

E. Loffredo, G. Castellana, A. Traversa, C.E. Gattullo, N. Senesi. Preliminary experiments of decontamination of municipal landfill leachate from bisphenol a and nonylphenol using the white-rot fungus *Trametes versicolor*. 7th European Conference on Pesticides and Related Organic Micropollutants in the Environment, Porto, Portogallo, 7-10 ottobre 2012, 407-408 (2012). ISBN: 978-989-20-3262-7.

C.E. Gattullo, B.B. Cunha, H.A. Rosa, N. Senesi, E. Loffredo. Use of radish and ryegrass to remove a mix of endocrine disruptors from natural aquatic systems. 7th European Conference on Pesticides and Related Organic Micropollutants in the Environment, Porto, Portogallo, 7-10 ottobre 2012, 139-140 (2012). ISBN: 978-989-20-3262-7.

B. Barboza Cunha, C. E. Gattullo, A. H. Rosa, E. Loffredo. Phytoremediation of three endocrine disruptors in natural and NOM-enriched waters. IX Encontro Brasileiro de Substâncias Húmicas (EBSH) Aracaju/Sergipe, Brasil, October 3-7, 2011. 3 pg (2011). <http://www.ixebsh.com.br>

C. E. Gattullo, H. Bährs, J. Qianru, C.E.W. Steinberg, E. Loffredo. Direct and Indirect Effects of Humic Substances of Different Origin on the Green Algae *Monoraphidium braunii*. Proc. 15th Inter. Meeting Humic Subst. Soc. "Advances in Natural Organic Matter and Humic Substances Research

2008-2010” Tenerife, Canary Islands, Spain, June 27-July 2, 2010. Vol. 3, 292-295. (2010). <http://hdl.handle.net/10261/26346>

E. Loffredo, A. J. Palazzo, A. Traversa, T.L. Bashore, N. Senesi. Effects of Compost Water-Extracts on the Germination and Growth of Slickspot Peppergrass (*Lepidium papilliferum*). Proc. 15th Inter. Meeting Humic Subst. Soc. "Advances in Natural Organic Matter and Humic Substances Research 2008-2010” Tenerife, Canary Islands, Spain, June 27-July 2, 2010. Vol. 3, 296-299. (2010). <http://hdl.handle.net/10261/26346>

A. Traversa, E. Loffredo, N. Senesi. Comparative Evaluation of the Inhibitory Action of Compost Humic Fractions on Two Soil-Borne Phytopathogenic Fungi. Proc. 15th Inter. Meeting Humic Subst. Soc. "Advances in Natural Organic Matter and Humic Substances Research 2008-2010” Tenerife, Canary Islands, Spain, June 27-July 2, 2010. Vol. 3, 273-276. (2010). <http://hdl.handle.net/10261/26346>

C. E. Gattullo, E. Loffredo, N. Senesi. The Role of Different Natural Organic Fractions in the Phytoremediation of the Endocrine Disruptor Compound 4-Nonylphenol. Proc. 15th Inter. Meeting Humic Subst. Soc. "Advances in Natural Organic Matter and Humic Substances Research 2008-2010” Tenerife, Canary Islands, Spain, June 27-July 2, 2010. Vol. 1, 169-172.
