

## Coronaviruses: past, present and future threats to humans and animals

### Coronavirus: un pericolo per l'uomo e gli animali nel passato, presente e futuro

**Seminario - 16 Ottobre 2023, 14.30-16.30**

#### Speaker

**Prof. Linda Saif**- Center for Food Animal Health (CFAH) CFAES/OARDC/CVM, The Ohio State University, USA

#### Moderatore

**Prof. Vito Martella** - Università di Bari, DiMeV

#### Saluti

**Prof. Maria Tempesta** - Coordinatrice del Dottorato di ricerca in Sanità animale e zoonosi, Università di Bari, DiMeV

**Prof. Marialaura Corrente** – Direttrice della Scuola di Specializzazione in Malattie Infettive, Profilassi e Polizia Veterinaria, Università di Bari, DiMeV

#### Sinossi

Coronaviruses are important pathogens of humans and animals. Before the emergence of SARS-CoV-1, the first highly pathogenic human coronavirus, information was very scarce about human coronaviruses, whereas there was extensive knowledge in veterinary medicine about animal coronaviruses, their evolution and pathobiology. The lecture summarizes the impact of coronaviruses on human and animal health.
