(Prof. Giuseppe Di Martino)

University of Bari Aldo Moro
Master in Management

Pre-requisites

Enter Pre-requisites: No prerequisites are required

Objectives

The course aims to give the knowledge of the main concepts of corporate finance and the skills supporting the business cases.

Course content

The course focuses on the principles and tools of business decisions about investments and financing for creating shareholder value. In this perspective, the course proposes some business applications of main financial theories. These applications concern both financial policies and financial management and cover the main tasks of the chief financial officer and the cash manager. The course contents are organized into seven modules: 1) goals, functions and tools of business financial valuation; 2) tools for financial analysis and planning; 3) risk and return and cost of capital; 4) business investment valuation; 5) stock valuation; 6) financial structure; 7) business valuation.
