(Prof. Intonti Mariantonietta)

University of Bari Aldo Moro
Bachelor in Economics of financial makets and institutions

Pre-requisites

See Course Regulations (Regolamento didattico).

Objectives

The course aims to analyze the problems relating to the activity of securities markets. To this end, the lessons will focus on the analysis of financial investments, on the structure and functioning of the securities market, on the activities of securities intermediaries. The program is divided into three parts: the first is related to the institutional structure of financial markets, the second is on the financial instruments, the third is on the market activities.

Course content

First part

Organization of the markets and emission of financial instruments, evolution of financial markets and impact of the MiFID Directive on the investment services, discipline of financial intermediation.

Second part

Bonds, stocks and stock markets, derivatives securities markets, innovative bonds, mutual fund, valuation of financial instruments.

Third part

Structure and organization of market institutions, financial markets and their infrastructure in Italy.

Compulsory reading – study material
