

**Calendar of the teaching program of Prof. J.A. Ikonopoulos**  
President of the European College of Veterinary Microbiology  
School of Animal Science and Aquaculture, Agricultural Univ. of Athens (Greece)  
PhD course “Animal Health and Zoonoses

<b>Date</b>	<b>Lectures</b>	<b>Time</b>
22.05.2019	The parameters used for the evaluation of the performance of diagnostic tests used for the detection of infectious agents.	14:00 – 18:00
28.05.2019	Designing a strategy for the laboratory diagnostic investigation of an infectious disease.  Designing a strategy for the pre-analytical and post-analytical evaluation of a diagnostic test.	13:30 – 17:30
29.05.2019	Quality Assurance in veterinary diagnostic laboratories: ISO17025.	13:30 – 17:30
08.07.2019	Nanotechnology in veterinary medicine.  Genetic predisposition to infectious diseases.	13:30 – 17:30
10.07.2019	The context of zoonotic diseases today: new challenges and threats.	13:30 – 15:30
11.07.2019	Tuberculosis: the disease context in humans and animals, and the problem of drug resistance	13:30 – 17:30

31.07.2019	Paratuberculosis of ruminants: an update on laboratory investigation, measures of prevention, and public health implication	13:30 – 15:30
01.08.2019	Brucellosis of humans and animals: an update.	13:30 – 15:30
02.08.2019	Infections induced to humans and animals by Gram-positive cocci	13:30 – 17:30
