Note ai testi di riferimento	
Metodi didattici	topics of the course will be treated with the help of Power Point presentations.
Metodi di valutazione (indicare almeno la tipologia scritto, orale, altro)	oral
Criteri di valutazione	<p>For students enrolled in the year of the course in which teaching is carried out, there is an exemption test, which will concern some parts of the program; in particular, reference will be made to the topics of description of the agricultural sector and its main economic problems and to the critical description of the agri-food system, for a total of 1.5 credits. The outcome of this test contributes to the assessment of the profit exam and is valid for one academic year. The exam consists of an oral test on the topics developed during the theoretical and theoretical-practical lessons in the classroom, as reported in the Didactic Regulations of the Degree Course in Agricultural Sciences and Technologies (art.9) and in the study plan (annex A). The student's preparation is assessed on the basis of pre-established criteria, as detailed in Annex A of the Didactic Regulations of the Degree Course. For students who have taken the exemption test, the assessment of the exam is expressed as an arithmetic mean between the exemption mark and the final exam mark.</p>
