## LAUREA MAGISTRALE IN MEDICINA DELLE PIANTE INTERNATIONAL JOINT MASTER DEGREE IN PLANT MEDICINE

General Information	
Academic subject	Applied Entomology (Module of I.C. Applied Entomology for
	Mediterranean crops)
Degree course	Master Course in Plant Medicine (LM69)
Curriculum	Applied Entomology for Mediterranean crops
ECTS credits	6
Compulsory attendance	No
Language	Italian

Subject teacher	Name Surname	Mail address	SSD
	Rocco ADDANTE	rocco.addante@uniba.it	AGR/11
ECTS credits details			

ECTS credits details		
Basic teaching activities	Plant Protection	
	disciplines	

Class schedule	
Period	Second semester
Year	First year
Type of class	Lectures 4 ECTS (32 hours)
	Laboratory and field classroom, 2 ECTS (28 hours)

Time management	
Hours	150
In-class study hours	60 (32 Lectures + 28 Lab & field cl.)
Out-of-class study hours	90

Academic calendar	
Class begins	March 2, 2020
Class ends	June 12, 2020

Syllabus	
Prerequisites/requirements	Knowledge of zoology and general entomology is requested for
	admission to the Master course.
Expected learning outcomes	Knowledge and understanding
	o Knowledge of bio-ethology and ecology of the main insect species included in the teaching program.
	o Knowledge of the interactions between phytophagous insects and the main components of agro-ecosystems.
	o Knowledge of methods and equipment for monitoring and sampling phytophagous insects.
	o Knowledge of some predictive models of phytophagous insects.
	o Knowledge of crop protection management with particular regard to the biological and integrated control of phytophagous insects.
	Applying knowledge and understanding
	o Ability to identify phytophagous insects and the symptoms

Pianta e degli Alimenti

## LAUREA MAGISTRALE IN MEDICINA DELLE PIANTE INTERNATIONAL JOINT MASTER DEGREE IN PLANT MEDICINE

Contents	they induce on host plants, as well as the main natural enemies o Ability to properly monitor and sample harmful insects o Ability to use the means for controlling harmful insects  • Making informed judgments and choices  • Ability to apply the acquired knowledge on the management of phytophagous insects to different field realities after careful evaluation of production and market variables and in full respect and protection of the environment and consumers  • Ability to learn  • Learning skills will be evaluated in the classroom by putting oral questions on the main subjects of the teaching program. The expected learning outcomes, in terms of knowledge and skills, are listed in Annex A of the Study Course Regulations (expressed through the European Degree Program descriptions)  Introduction. Classification of Insects. Characteristics of the main Insect Orders.  The main insect pests of Stone-fruits: Monosteira unicostata, Myzus
	persicae, Armored scales, Nectarine thrips, Cossus cossus, Anarsia lineatella, Cydia molesta, Ceratitis capitata, Rhagoletis cerasi, Drosophila suzukii, Capnodis tenebrionis.  The main insect pests of Citrus: Aleurothrixus floccosus, Aphis spiraecola, Aphis gossypii, Toxoptera aurantii, Icerya purchasi, Planococcus citri, Aonidiella aurantii, Phyllocnistis citrella.  The main insect pests of Vegetables: Trialeurodes vaporariorum, Aphis fabae, Thrips tabaci, Tuta absoluta, Helicoverpa armigera, Gortyna xanthenes, Liriomyza huidobrensis, Leptinotarsa decemlineata.  The main insect pests of Cereals: Dociostaurus maroccanus, Agriotes lineatus.  The main insect pests of Olive: Saissetia oleae, Zeuzera pyrina, Prays
	oleae, Bactrocera (=Dacus) oleae. The main insect pests of Grape-vine: Frankliniella occidentalis, Planococcus ficus, Lobesia botrana.
Course program

Notes	The teacher's Power Point presentations are available by registering on the website: http://tempus-it.agrif.bg.ac.rs/registration.php?register=Registra
Teaching methods	The course topics will be featured with PowerPoint presentations and movie support.
Assessment methods (indicate at least the type written, oral, other)	For students enrolled in the course year in which the lessons are held, an oral intermediate examination is envisaged, whose vote is expressed in thirtieths. The Profit Exam consists of an oral exam on the topics developed during the theoretical and practical lessons in the classroom and in the laboratory as reported in the Didactic

## LAUREA MAGISTRALE IN MEDICINA DELLE PIANTE INTERNATIONAL JOINT MASTER DEGREE IN PLANT MEDICINE

	Regulations of the Master of Science in Plants Medicine (Article 9)
	and in the Plan of study (Annex A).
	The assessment of the student's preparation takes place on the
	basis of established criteria, as detailed in Annex A of the Teaching
	Regulations of the Master Degree.
	For students who have passed the intermediate examination, the
	final grade is obtained as the average between the grade on the
	intermediate examination and the final exam.
	For foreign students the exam can be made as a written
	questionnaire in multiple closed answers.
Evaluation criteria	Knowledge and understanding skills
	The student must demonstrate to know
	o the bio-ethology and ecology of insect species
	included in the teaching program,
	o the interactions between phytophagous insects and
	the main factors of agro-ecosystems,
	<ul> <li>the methods and tools for monitoring and sampling</li> </ul>
	phytophagous insects,
	o some predictive models of phytophagous insects,
	o the criteria of crop protection management with
	particular regard to the biological and integrated
	control of phytophagous insects.
	Applying knowledge and understanding
	<ul> <li>The student must own the ability</li> </ul>
	o to identify phytophagous insects and the symptoms
	they induce on host plants, as well as their main
	natural enemies
	o to properly monitor and sample phytophagous insects
	o to use proper methods and tools to control phytophagous insects.
	Making informed judgments and choices
	The student must be able to apply the acquired
	knowledge on the management of phytophagous
	insects to the different field realities.
	Ability to learn
	o The student must demonstrate that he/she has
	learned the main topics discussed during the course of
	the curriculum.
	Communication skills     Ability to a graning the apprinced lynguised by a form of
	o ability to organize the acquired knowledge in form of
	didactic presentation and to articulate it for didactic
	purposes
Further information	Visiting hours
	All afternoons by previous agreement.
