Senior Backend Engineer (m/f/x) at BurdaForward Italia

At BurdaForward we have a common mission: to support and provide people with individual, reliable and solution-oriented content throughout the day and help them lead a better life. That's why we do not only outline problems but point out how things can be improved - in society and in everyday life. We combine first-class journalism with innovative technology!

Your challenging task…

- Backend application development with a variety of frameworks and languages including but not limited to PHP, MySQL, Elasticsearch, Docker, AWS, Symfony and GO
- You will work on the design and architecture of our old and new proprietary backend transaction technology.
- You will develop projects and components and be a role model for excellent code.
- You have excellent communication skills and can discuss convincingly with software engineers, administrators, interfaces from the departments and management at eye level and mediate between the worlds.
- You have extensive practical experience in the development of distributed, highly scalable systems (ideally in an AWS environment).
- You have a lot of experience in persistence mechanisms and adequate data modeling - from classical relational databases to horizontally scaling NoSQL systems.
- You have experience in integrating backend services (e.g. REST APIs, JSON, XML, ETL).
- You will be responsible for structure, maintainability and quality of your applications.

Your convincing background...
Minimum Qualification

- You have solid practical experiences as Senior Software Engineer
- You have at least 5+ years of experience with relational databases to horizontally scaling NoSQL systems as well as distributed, highly scalable systems and web technologies: PHP, Symfony
- You can speak and write in English fluently and enjoy working in an international environment

Preferred Qualification

- You proactively expand your knowledge and further educate yourself in machine learning and/or AI
- You are interested in new trends in software engineering and software architecture without forgetting proven technologies and patterns
- You want to work in a company that uses agile methodologies

Your turn: If you think this position is right for you and that you can help us make BurdaForward big in Bari, we'd be delighted to talk to you. Simply click apply and send us your English application: https://www.burda-forward.de/en/career/jobs/
