

Ariston Thermo is introducing several new technologies to execute its **digitalization strategy** and the ICT department will play a crucial role in this company transformation.

Are you a new graduate with a Master's Degree in Computer Science, Engineering, Mathematics or Statistics? Would you define yourself as a proactive, open minded and ambitious person? Are you interested in starting your career in a multinational company and build up a development path that gives you the possibility to work on new digital technologies?

We are looking for:

E-PROCUREMENT SOLUTION SPECIALIST

Our company is going to launch a new project aimed at introducing a new e-procurement platform to digitalize the business-to-business purchase of component and services through the Internet as well as other information and networking systems, such as electronic data interchange and enterprise resource planning.

PRODUCT LIFECYCLE MANAGEMENT (PLM) SOLUTION SPECIALIST

Our company is going to launch a new project aimed at introducing a new platform to digitalize the entire product lifecycle management from inception, through engineering design and manufacture.

Do not hesitate to apply and get in touch with us to know more about these opportunities.
