Syllabus	
Learning Objectives	<p>Knowledge of the development and evolution of European economic policies under two perspectives: transfer of competences from Member States to the European Union (EU) and their specific content.</p> <p>Providing students with adequate knowledge of European economic policies, especially of their development and interaction with national economic policies.</p> <p>The course allows students to analyze the problems and dynamics of the EU and the relative policies, with special reference to most recent transformations and most critical aspects.</p> <p>The course allows students to acquire knowledge on the reasons behind the different policies, evaluating their relevance and implementation in different fields and countries.</p> <p>The course allows students to formulate autonomous judgments on the process of EU integration and the related policies.</p> <p>The course is based on lectures properly prepared to provide students with all the necessary technical terminology that allows them to better understand current analyses.</p>

	<p>Each of the different modules of the course makes use of concepts and knowledge of the previous ones such that students can evaluate their own learning processes <i>in itinere</i>.</p> <p>Professor encourages students' discussion during classes, therefore facilitating direct interaction and comparison of ideas. Students are also invited to formulate critical assessments of the regional development processes and the related policies.</p> <p>Teaching and testing methods are deemed to stimulate students' continuous learning, especially by optimally organizing time between classes attendance and individual study.</p>
