in the Recording Studio**

The screenshot shows a video player interface. The main content is a video of a woman with dark hair and glasses, wearing a dark purple top, sitting in front of a wooden bookshelf. The bookshelf contains various items, including a framed certificate or poster on the left and a small white card on a shelf. The video player has a standard Windows taskbar at the bottom, showing several application icons. In the bottom right corner, there is a dark grey notification box with a yellow profile picture icon, the text "WhenGamersFail - Lyon LYON E ANNA LITIGANO SU PIKUNIKUJI", the URL "Google Chrome - www.youtube.com", and a "Chiudi" button.

What do we do?

How do we do it?

We study **grammar**, **lexis** and **phrases** through the language of politicians.

Examples taken from **real** life language use!

We study **grammar**, **lexis** and **phrases** through the language of politicians.

Examples taken from **real** life language use!

What is a phrase?

A phrase is a multi-word unit whose meaning is not given by the parts of the individual words that make it up.

In a phrase each word loses its original meaning and the words combined acquire a new meaning.

Nations Unies

Conférence sur les Changements Climatiques 2015

COP21/CMP11

Paris, France

The Paris Agreement was adopted by 197 countries

Nearly every nation on earth was pledging to address what an overwhelming majority of scientists view as an undeniable fact:

Climate change is **REAL** and is caused, in no small part, by human activity.

Despite this momentous transnational achievement, Americans remain more divided than ever on the issue.

Nations Unies

Conférence sur les Changements Climatiques 2015

COP21/CMP11

Paris, France

Despite overwhelming scientific consensus, millions of Americans fail to view climate change as a pressing threat.

Despite hard scientific evidence and broad acknowledgement of the problem, some people remain indifferent, confused, or downright opposed to the idea of anthropogenic change.

This disconnect between science and public opinion is alarming, and shows the power the media have in shaping public opinion.

Help

their stated agenda includes rejoining the Paris Climate Accord, spending billions and billions of dollars in order to make it at all your decision in renegotiating the Paris Climate Accord? THE PRESIDENT: No, I want crystal clean water. I want every single one of the signatories to the Paris Climate Accord lags behind America in overall emissions reductions. You've basically taken away your wealth, the Paris Climate Accord. And the other countries don't have to adhere to it. China has been done to our country with the Paris Climate Accord. And it is so unfair. It doesn't kick in for China until 2020.

95 world, they say. I withdrew the United States from the terrible, one-sided Paris Climate Accord. It was a total disaster for our country. (Applause.)

96 I withdrew the United States from the terrible, very expensive, one-sided Paris Climate Accord. (Applause.) You just take a look at Paris. The President

97 has, and it's rising fast. By contrast, after I withdrew from the one-sided Paris Climate Accord, last year America reduced its carbon emissions by more

98 than the two of them. We withdrew the United States from the one-sided Paris Climate Accord, where you don't do any more drilling for oil and gas.

99 And for our farmers and workers, we've withdrawn the United States from the one-sided Paris Climate Accord. (Applause.) And I won't get into it, but believe me, the President

100 wants to kill American energy. He wants to reenter the unfair, one-sided Paris Climate Accord — which will destroy us — at the expense of many other

101 countries, whether it was NAFTA, TPP, the horrible Korea deal, the ridiculous Paris Climate Accord — how's it working out for Paris? Not so good. And China

102 has, 25 percent of our businesses in order to qualify under this ridiculous Paris Climate Accord. It sounds good. It was very bad, very expensive. The President

103 has, So, federal housing now can go to inmates — former inmates. Rejoin Paris Climate Accord, and seek an even higher level of restrictions. Oh, I did

104 not, I withdrew from the horrible Trans-Pacific Partnership and the impossible Paris Climate Accord, renegotiated the one-sided South Korea deal, and we

105 have to make it very tough on you with tariffs." And we got out of the horrible Paris Climate Accord that he'll go back into because, you know, it sounds wonderful

106 for years," "don't frack, don't drill, we don't want any energy" — the horrible Paris Climate Accord that killed American jobs and shielded foreign polluters

107 from the United States from the unfair, ineffective, and very, very expensive Paris Climate Accord. (Applause.) Thank you. Thank you. My administration

108 has, House Democrats voted to put America back into the disastrous Paris Climate Accord. How's that working out for Paris? How's that one working

109 out? It will demolish Ohio oil and gas jobs. They want to rejoin the disastrous Paris Climate Accord, where you'll pay billions and billions of dollars for the

110 energy in big, big trouble. I withdrew from the one-sided, energy-destroying Paris Climate Accord. It was a disaster. (Applause.) It cost us billions of dollars

111 and we get to disagree. And when we disagree on immigration, on foreign policy, climate change, we should fight hard. But we have a responsibility, what

112 do you recommend we address the divide in the American political climate? THE PRESIDENT: We'll start getting together. We'll start getting together

...rent views on many different things: trade, climate change, and other things. But again, the strength of NATO is that, despite
...also set out the UK's approach to tackling climate change and our continued support for the Paris Agreement. And we also

116 to have to see. I am going to Arizona. I look forward to that. I'll have to see the climate. I mean, I'm going to look and see, you know, where I am. Here is a
117 , you know, you know who developed it? AOC+3. They know nothing about the climate. I mean, she's got a good line of stuff, but she knows nothing about the
118 room. But as far as where I'm going in Arizona, I'm going to have to look at the climate. I'd have no problem wearing a mask. I don't know. I'm supposed to
119 from. I withdrew from the one-sided Pari- — if you — if you see it, the Paris Climate — I call it the Paris Climate disaster. This was a way of — (applause)
120 And, you know, when people ask the question — your part of the question about climate — I always say: You know, I have a little problem. We have a relatively
121 debt is we're paying very little interest — almost nothing. This is a great interest climate. In fact, I want to refinance the debt. But I had to fix the military. The
122 very important that we implement and fulfill the Paris Agreement because of the climate issue. And on that, we might differ. Terrorists, as well. But having said
123 and I'll create \$1 trillion more in economic growth than his proposal does, not on climate just on the economy. Trump: President Trump, your response — Trump:

... on — than we realize, did you mean on climate change or did you just mean in general? THE PRESIDENT: Well, I think when state officials there blame the fires on climate change, Mr. President, you said, 'I don't think the science knows.' Over time, though, change your opinion at all on climate change, Mr. President? THE PRESIDENT: No. No. I have a strong opinion. Q Mr. President, why did you go to the climate change meeting today? What prompted you to pop in there?

76 of forest management? And is it possible that it's also forest management and climate change — it's both of things at the same time? THE PRESIDENT: Well, I
77 at the beginning, and I think he'll admit that. Q Do you believe that there's a climate change issue here in California at all? THE PRESIDENT: Say it? Q Is
78 change issue here in California at all? THE PRESIDENT: Say it? Q Is there a climate change issue in California? THE PRESIDENT: Uh, you'll have to ask the
79 THE PRESIDENT: Yeah. Q But now another big question is, is it possible that climate change is a real issue here and that there needs to be change? THE
80 very good. (Laughter.) Any questions, please? Q Yeah. Mr. President, climate change is a top priority for the Prime Minister here, as well as for
81 and to, really, big issues like climate change? THE PRESIDENT: Well, you know, climate change is a very complex issue. I consider myself to be, in many ways,
82 of management, producing these extreme densities. And climate change is — climate change is — and I can't do much about that, because as a forester
83 about Laura. So in June of this year, NOAA issued a report indicating that climate change is at least in part responsible for increasing sea temperatures,
84 , as well as the lack of management, producing these extreme densities. And climate change is — climate change is — and I can't do much about that,
85 . But I would have loved to have seen her speak. I did not. Q Do you still think climate change is hoax? THE PRESIDENT: No, not at all. I think what is — I
86 , if we look at climate change. Why is it that you still think ignoring the dangers of climate change is in the interest of the American (inaudible)? THE PRESIDENT: I
87 it's been. Q So what would be your most common ground? You know, is it climate change? Is it gender equality? PRESIDENT TRUMP: Oh, oh. I think we
88 , where we submit the science is in and observed evidence is self-evident that climate change is real, and that is exacerbating this. And so I think there's an
89 is it not — PRESIDENT TRUMP: I think about it all the time, Phil. And, honestly, climate change is very important to me. And, you know, I've done many
90 you. Thank you everyone. Thank you. Q Mr. President, do you see any role of climate change in the — in these fires that we've seen in California recently? THE
91 that we've seen in California recently? THE PRESIDENT: Say it. Q The role of climate change in these fires in California? THE PRESIDENT: Well, I think you
92 strongly in very, very crystal clear, clean water and clean air. That's a big part of climate change. I also see what's happening with our oceans, where certain
93 . You just — Q So do you think you have similarities with Governor Brown on climate change? GOVERNOR BROWN: I — let me answer that. Q Yeah,
94 busy. I'm going on the floods today. The floods are very important to me. And climate change — everything is very important. But today I'm going to Texas on

three years, nobody has done the kind of numbers we've done.
but it's really going to be up to the Senate. We're going to have them make that determination.
speaker here, but you shared some of the spotlight with a Scandinavian teenager: Greta Thunberg —

anger. She had some very harsh words about —

THE PRESIDENT: I didn't say "anger." I said "anger management."

Q "Anger management." Yes, sir.

She had some very strong words here that the United States and other industrialized countries need to do more. Do you still feel that you're doing enough? You talk about clean air —

THE PRESIDENT: How old — how old is she?

Q She's —

Q Seventeen.

Q Seventeen now. Yes.

THE PRESIDENT: Oh. That's good.

Q But what is your response to her —

THE PRESIDENT: She beat me out on TIME Magazine.

Q But did you hear from other world leaders and business leaders who said that they think that she has a message that you should listen to?

THE PRESIDENT: No, I didn't actually. But I would have loved to have seen her speak. I did not.

Q Do you still think climate change is hoax?

THE PRESIDENT: No, not at all. I think what is — I think aspects of it are. I think that some people are — they put it at a level that is, you know, unrealistic, to a point you can't live your lives.

We want to have the cleanest water on Earth. We want to have the cleanest air on Earth. Our numbers, as you saw — we had record numbers come out very recently. Our numbers are very, very good — our environmental numbers. Our water numbers, our — our numbers on air are tremendous.

We have to do something about other continents. We have to do something about other countries. When we're clean and beautiful and everything is good, but you have another continent where the fumes are rising at levels that you can't believe — I mean, I think Greta ought to focus on those places.

But we are doing better right now than we've ever done, in terms of cleanliness, in terms of numbers. We have a beautiful ocean called the Pacific Ocean, where thousands and thousands of tons of garbage flows toward us, and that's put there by other countries. So I think Greta has to start working on those other countries.

Q Mr. President —

 well. I think the governor agrees with me.

Yeah, please

Q Do you think global warming is a hoax or not? Yesterday, you said it will cool down. Does that mean it isn't there?

THE PRESIDENT: Well, I think you have people that don't want to address China. They don't want to address Russia. They don't want to address India. They don't want to address these countries that haven't done very much for global warming, for the carbon footprint — for any of the things that they talk about. You have a lot of countries that, you know, we're supposed to do it, and we do do it. By the way, our carbon numbers right now are very low. They're really low. Our water, our air — I want it to be clean. I want it to be immaculate. I want it to be crystal. I want it to be absolutely clean, and that's what we're doing. But we, at the same time, don't want to drive our businesses out because they can't compete. If you look at China, with all of the plants they have — you take — just take a look at China, and look at what's coming out of China. Take a look at our oceans and see who is dumping in our oceans. It's not us. It's not us. And I think that's something people should be addressing.

Q Did you see where the WTO had ruled that your tariffs on China were illegal?

THE PRESIDENT: What are they going to do?

Q The WTO ruled that your tariffs on China are illegal. Did you have a response to that?

THE PRESIDENT: Well, then we'll have to do something about the WTO because they've let China get away with murder. They consider China to be a developing nation. And by as a "developing nation," as that — did this just happen, Steve? It just happened?

Q Yes.

THE PRESIDENT: All right. Well, we'll take a look at that. But I'm not a big fan of the WTO — that, I can tell you right now. Maybe they did us a big favor.

Q On TikTok, sir — on TikTok, what do you think of the Oracle deal?

THE PRESIDENT: Well, we're going to make a decision pretty soon. I have a high respect for Larry Ellison. He's somebody I know. He's been, really, a terrific guy for a long time. So we're going to take a look. I heard they're very close to a deal, and we'll be looking at the TikTok deal with Larry Ellison and Oracle.

Q Mr. President, why do you suppose your former aides — General Mattis, General Kelly — have been reluctant to defend you in any way over the course of the past two weeks?

THE PRESIDENT: Because we're very different. And you can see that with the deal we made today. I'm not a big fan of General Mattis, as you know. I think he's a very overrated general.

But regardless, he — I guess he's a nice guy. He just didn't do the job for me. He didn't do the ISIS job. After we got rid of him, it worked out very well. We took over 100 percent of the caliphate.

But I do things differently. If you — if you listen to the three world leaders today — and these are highly respected leaders and countries. UAE is a — is a tremendously respected warrior. I mean, they're warriors. They're a very strong, respected country.

If you listen to what they said, nobody thought of the plan that I thought of. And it's going around the back door; I call it "going around the smart door and coming in a different way."

And we have many other countries going to be joining us, and they're going to be joining us soon. We'll have — I can — I mean, I think seven or eight or nine. We're going to have a lot of other countries joining us, including the big ones. We already have the big one, but including the big ones.

And this is not something that the people that you mentioned would be able to be doing. And it's not something that my critics thought was possible, and now they say, "Wow, that was a good idea." I will say it's gotten rave reviews, even from the New York Times and Tom Friedman and a lot of people that don't like Donald Trump too much. They've given it, literally, rave reviews.

So this is one deal, but we have many others like this. Look, our country has been stagnant for many years. We did nothing but give our money away, give our wealth away, and give our jobs away. And now we stopped that. We stopped that three and a half years ago.

Q What about the Saudis? Do you think Saudi Arabia will join?

THE PRESIDENT: I do. I spoke with the King of Saudi Arabia. At the right time, I do think they will come in. Yes, I do.

US withdrawal from the Paris Agreement

“Not only does this deal subject our citizens to harsh economic restrictions, it fails to our environmental ideals. As someone who cares deeply about the environment, which I do, I cannot in good conscience support a deal that the United States – which is what it does – the world’s leader in environmental protection, while imposing no meaningful obligations on the world’s leading polluters.

“For example, the agreement, China will be able to increase these emissions by a staggering number of years – 13. They can do whatever they want for 13 years. Not us. India makes its participation contingent on receiving billions and billions and billions of dollars in foreign aid from developed countries. There are many other examples. But the bottom line is that the Paris accord is, at the highest level, to the United States.

“Further, while the current agreement effectively blocks the development of clean coal in America – which it does, and the mines are starting to We’re having a big opening in two weeks. Pennsylvania, Ohio, West Virginia, so many places. A big opening of a brand new mine. It’s unheard of. For many, many years, that They asked me if I’d go.

“China will be allowed to build hundreds of additional coal plants. So, we can’t build the plants, but they can, according to this agreement. Indiato double its coal production by 2020. Think of it: India can double their coal production. We’re supposed to Even Europe is allowed to continue construction of coal plants.

“In short, the agreement doesn’t eliminate coal jobs, it just transfers those jobs out of America and the United States, and them to foreign countries.

US withdrawal from the Paris Agreement

“Not only does this deal subject our citizens to harsh economic restrictions, it fails to **live up to** our environmental ideals. As someone who cares deeply about the environment, which I do, I cannot in good conscience support a deal that **punishes** the United States – which is what it does – the world’s leader in environmental protection, while imposing no meaningful obligations on the world’s leading polluters.

“For example, **under** the agreement, China will be able to increase these emissions by a staggering number of years – 13. They can do whatever they want for 13 years. Not us. India makes its participation contingent on receiving billions and billions and billions of dollars in foreign aid from developed countries. There are many other examples. But the bottom line is that the Paris accord is **very unfair**, at the highest level, to the United States.

“Further, while the current agreement effectively blocks the development of clean coal in America – which it does, and the mines are starting to **open up**. We’re having a big opening in two weeks. Pennsylvania, Ohio, West Virginia, so many places. A big opening of a brand new mine. It’s unheard of. For many, many years, that **hasn’t happened**. They asked me if I’d go. **I’m going to try**.

“China will be allowed to build hundreds of additional coal plants. So, we can’t build the plants, but they can, according to this agreement. India **will be allowed** to double its coal production by 2020. Think of it: India can double their coal production. We’re supposed to **get rid of ours**. Even Europe is allowed to continue construction of coal plants.

“In short, the agreement doesn’t eliminate coal jobs, it just transfers those jobs out of America and the United States, and **ships** them to foreign countries.
